It beat its 5-year goal of 250 megawatts, and is now the largest solar photovoltaic plant in the world by capacity. "This is a great day for South Australia. Hornsdale will provide reliable, low-cost and emissions-free electricity for the next 10 years," said South Australia Premier Jay Weatherill. "While it's just the beginning of what can be a \$100 million investment in the state, it also demonstrates how a solar photovoltaic farm can provide reliable energy 24 hours a day, 7 days a week." Located near the town of Torren 82157476af
